

**Infrastructure Sector Consultant
NTU International A/S**

NTU International is a leading consulting firm providing programme management and advisory services for development projects worldwide. NTU works across all disciplines where individual projects are consistently tackled through holistic and innovative approaches.

The core infrastructure sectors where NTU focusses its services include: Transport, Sustainable Energy, Urban Development, Mobility, Social Infrastructure, Climate Change, Green Growth, and Water, Sanitation and Solid Waste Management. NTU also provides advisory services, as standalone or complementary and cross-cutting to infrastructure sectors, in Public Sector Management, PFM and Governance, Private Sector Development and Development Cooperation themes.

Due to a strong growth, NTU is currently looking to further strengthen our team with a specialist (junior / mid-level) in one or more above-mentioned areas of work to join its team of highly dedicated specialists as in-house or associate consultant.

Activities related to this position include:

- Prepare and/or contribute to preparation of high quality technical proposals for development projects for a variety of financing institutions (EC/EIB, WB, AfDB, ADB, NDF, etc) and R&I projects within Horizon 2020 or other;
- Contribute to development of innovative approaches and task methodologies for tackling specific project activities whereby comprehensively identifying the key issues and challenges faced by the government agencies responsible for the sector;
- Develop programme / project logical frameworks, inputs/outputs definition for specific project activities, overall work plans and resource requirements;
- Field specific expert positions (short-term) in running projects in accordance with own area of expertise, if/as available over time;
- Provide advice and support to the Project Implementation Team on technical issues arising in ongoing projects and participation in project progress meetings with the clients and project teams;
- Provide technical backstopping to project teams, inputs to reports drafting as well as quality review of project outputs;
- Participate in workshops and/or deliver training on specific topics falling in own area of expertise, if required.

Profile:

- Master's degree or higher level education in a field related to infrastructure (e.g. transport, energy, environment) economics or engineering, and/or public sector management/legal studies, public finance, development economics, etc.;
- Studies or work experience in project management is an asset;
- Solid general work experience
- Demonstrated specialist experience in the infrastructure sectors and/or related disciplines through participation to project studies, programme formulation and/or methodological proposals development;
- Committed to team work but also capable to work individually on specific tasks;
- Quality oriented with a good eye for detail;
- Superior presentation and communication skills
- Fluent in English (both speaking and writing);
- Working knowledge of other languages such as French and Spanish is an asset.

NTU offers an attractive remuneration package and flexible work arrangements, and opportunities for specialist knowledge and career development. Interested candidates are encouraged to apply by 15 January 2018. The actual start date will be decided upon availability of the selected candidates.

Applications shall be sent for the attention of Gabriela Anton at the e-mail address: fga@ntu.eu.
