

<b>Project title:</b>	EU Global Technical Assistance Facility (TAF) for sustainable energy
<b>Position:</b>	<i>Expert in policies and the institutional and regulatory framework of the energy sector</i>
<b>Location:</b>	Brussels
<b>Eligible nationalities:</b>	All nationalities
<b>Start of project:</b>	January 2020
<b>Assignment duration:</b>	Full time within 48 months
<b>Deadline for the applications:</b>	<b>03/06/2019</b>
<b>Objective of the project:</b>	<p>The overall objective of this project is to contribute to establishing the necessary conditions for achieving the SDG 7 goals in sustainable energy and possible interlinkages with other SDGs. It will as well contribute to the SDG 13 goals related to climate action in Development Cooperation Instrument (DCI) eligible countries with a focus on Sub-Saharan Africa.</p> <p>The purpose of the project is to deliver high level technical assistance and policy advice at country, regional and global level through expert missions that will be mobilised at short notice to support committed countries and partners to reach the SDG7 objectives. It will support developing countries to improve their policy and regulatory framework conditions aiming at providing attractive and enabling conditions for increased public and private investment in energy access, renewable energy as well as energy efficiency taking into account climate change, gender and health impacts especially under the framework of the EIP.</p> <p>The contract will continue the work of the former Technical Assistance Facility (TAF) contracts and should become a quality reference for EU energy actions. Its experts will assume diverse roles ranging from technical advice to project structuring, negotiation facilitation with technical stakeholders as well as communication activities even at global level. The structure of the project aims to link DG DEVCO HQ's thematic expertise with country actions, sector information and project realities on the ground. The project structure should be flexible to respond to priorities and adapt its programme so as to make best use of the available funds.</p>
<b>Qualifications required:</b>	<p><u>Qualifications and skills</u></p> <ul style="list-style-type: none"> <li>• Post-secondary degree in economics, regulation, law, business administration, political science, public administration, engineering or equivalent, followed by a Master's Degree or equivalent (in any field);</li> <li>• Fluent in spoken and written Spanish and English;</li> <li>• Advanced communication skills</li> <li>• Advanced IT skills</li> </ul> <p><u>General professional experience</u></p> <ul style="list-style-type: none"> <li>• At least 12 years of professional experience in the field of energy</li> </ul> <p><u>Specific professional experience</u></p> <ul style="list-style-type: none"> <li>• At least 7 years of experience related to the policy and regulatory framework of the energy sector (e.g. electricity codes, tariff policies, renewable energy and/or energy efficiency regulation and support schemes, electricity planning and masterplans, unbundling processes, support to regulatory authorities, mini-grid or independent production regulation, energy access masterplans, energy statistics, energy markets), some of which must be in Latin America and/or Asia;</li> <li>• Working experience in a national or regional regulatory authority, in an energy Ministry or in the commercial/legal part of a utility is an asset;</li> <li>• Provision of technical assistance related to sustainable energy for international organisations and/or International Finance Institutions (IFIs) and/or sustainable energy agencies is an asset;</li> <li>• Experience in managing technical assistance teams is an asset;</li> <li>• Experience in the EU policy and/or <i>acquis communautaire</i> in the field of energy is an asset;</li> <li>• Previous experience with EU-funded projects or for large donor organisations is an asset.</li> </ul>
