

Project title:	Technical Assistance for the Capacity Building of KGM for the Road Infrastructure Safety Management in Turkey, EuropeAid/140089/IH/SER/TR
Position:	Safe Road Design Expert (minimum of 192 working days)
Location:	Turkey
Eligible nationalities:	All nationalities
Start of project:	September 2020
Assignment duration:	24 months
Deadline:	10th of March 2020
Objective and purpose of the project:	<p>The overall objective of the contract is to achieve a shift towards a safer, environmentally friendly transport system reflecting a more balanced modal split. The purpose of this contract is to harmonise Turkish Legislation with Directive 2008/96/EC and enhance capacity at KGM to implement road infrastructure safety management, resulting in enhanced road infrastructure safety management.</p> <p>The expected results are:</p> <ul style="list-style-type: none"> • Support to the harmonisation of Turkish legislation towards Directive 2008/96/EC on road infrastructure safety management. • In order to implement Directive 2008/96/EC, gap analysis and report, legislative documents, guidelines and related documents will be prepared. Furthermore, technical visits to EU Member States will be organised to investigate good practices of the implementation of the Directive. To inform about related activities and progress of the project, workshops for executives and related stakeholders and workshops for indirect target group to be organized. • Enhanced capacity at KGM to implement road infrastructure safety management. • Make a revision of design manuals of KGM, prepare handbooks, training programme and training material for road safety impact assessment (RSIA), road safety audit (RSA), road safety inspection (RSI), network safety management (NSM). Realize trainings (including certification) for KGM personnel on these four subjects and organize site visits including workshops in EU Member State(s) about the implementation of Directive 2008/96/EC and seeing the best practices in site.
Qualifications required:	<p>The Safe Road Design Expert will primarily be responsible for all the activities related to implementation of the project: preparing design manuals, handbooks (for RSIA, RSA, RSI, and NSM), training programme and materials, trainings and site visits. The minimum percentage of time that the Safe Road Design Expert will work in Turkey is 90 %.</p> <p><u>Qualifications and skills:</u></p> <ul style="list-style-type: none"> • University degree in a discipline relevant to their area of expertise. In the absence of a university degree in this field, a minimum of 10 years of professional experience in safe road design is required, • A graduate or post-graduate qualification on road transport is an asset, • Fluency in English, • Good level of computer literacy. <p><u>General professional experience :</u></p> <ul style="list-style-type: none"> • Minimum 10 years of general professional experience related to transport sector. <p><u>Specific professional experience :</u></p> <ul style="list-style-type: none"> • Minimum 5 years of experience in safe road design, • Minimum 3 years of experience in road infrastructure projects (including project design and/or implementation), • Minimum 3 separate road safety auditing experience compliant with Directive 2008/96/EC as auditor is an asset.
