

We are currently recruiting a Sustainable Energy Consultant for the permanent position to support the growth of opportunities and projects in relation to Energy sector, with a focus on working with existing Clients and winning new business.

NTU International is a leading international consulting firm providing programme management and advisory services for development projects worldwide. For almost three decades, NTU has been delivering sustainable development projects and advisory services within engineering, policy, economics, and social fields. With more than 1.100 international projects and studies already completed, and 15 project offices around the world, we have established ourselves as a leading consulting company. With the expansion of international activities and clients, NTU's project pipeline and opportunities have grown significantly, therefore, we are looking for an experienced, motivated and result oriented individual, who is interested in experiencing our culture, intensive business environment, challenges as well as being part of our international success.

Key Responsibilities:

- Delivery of Quality Control and Technical Backstopping to our projects in the energy sector (incl. tech advice to the team in the field, interface with the client, support with reporting, etc.)
- Preparation of technical parts of Energy Sector Methodologies and Bids
- Contributions to the other methodologies & NTU Research and Innovation projects
- Expert work on NTU projects within the Energy Sector in Europe, Asia & Africa

Qualifications and skills:

- A Master's degree within the Engineering field / Sustainable Energy Planning or other relevant area

Professional experience:

- Min. 5 (ideally 10) years of experience as Project Engineer / Consultant in the energy field
- Experience in RE and EE
- Experience with IFI funded projects (preferably at least with EU/EIB and WB/ADB type)
- Experience with regions such as Africa and Asia (other regions are a plus)
- Experience in project proposal/ technical proposal / methodology preparation for tenders (min. 5)
- Proficiency in Microsoft Office Products (Word, Excel, PowerPoint)
- Other engineering programmes

Personal skills and attitudes:

- Excellent coordination skills, a structured and organized mindset
- Innovative approach and strong report writing skills
- Great team working and people skills as well as independent drive and an eye for detail
- Ability to work under pressure

- Ability to manage multiple processes, questions and deadlines at the same time, while keeping communication professional

Language and skills:

- Full professional proficiency in English, both written and spoken. Proficiency in French/Spanish/Portuguese/Russian/Romanian would be considered an advantage.
